EDUCATION

Inderprastha Engineering College	Expected Aug 2024
Computer Science and Engineering CGPA - 7.89 (Upto 6th Sem)	
Children's Academy Senior Secondary School (XII)	2020
Intermediate Percentage : 85.6%	
Children's Academy Senior Secondary School (X)	2018
High School Percentage : 77.8%	

SKILLS

Languages : C,C++, HTML, CSS , JavaScript, Node Js
Framework : Express.js
Libraries : React JS, Redux/Redux Toolkit, React Router
Database : MySQL, MongoDB
Tools : Git, Github , VS Code, Adobe Xd, Figma, Canva, Adobe Photoshop

WORK EXPERIENCE

- **Ingelt, Remote - Ui/Ux Developer** Dec 2022 - Feb 2023
During my tenure as a UI/UX Developer Intern, I collaborated with a team on multiple projects, playing an active role in designing visually appealing websites.

PROJECTS

- **StartXup Website** ([Github](#))
 1. This web-based project offers users the functionality to manage and view details of multiple startups.
 2. The frontend was developed using React, while the backend was created using Node and Express. The data is securely stored on the server in a JSON file.
- **Food Ordering Cart (React JS , HTML , CSS , JavaScript)** ([Github](#))
 1. This app is developed using a combination of React Hooks and API fetch from Firebase. It leverages these technologies to retrieve food items from the database and present them to the user.
 2. The user has selected the desired quantity of each item, the app generates a bill reflecting the total amount due. The user must then enter their personal details for billing purposes, which are stored in Firebase, along with the selected items.
- **Online Session Booking System** ([Github](#))
 1. Developed an online session booking system using React and Redux for state management. Implemented user authentication and authorization, allowing students and teachers to access respective dashboards based on their account types.
 2. The technology utilized in this project includes React JS, Tailwind CSS, Redux, Context API, JWT, Cookies, Node.js, Express JS, MongoDB.
- **Auth App (Node JS, Express JS, Mongo DB)** ([Github](#))
 1. This application offers authentication and authorization capabilities.
 2. Once a user successfully completes the authentication process, they will be able to access specific features that require authorization.
- **Notes App** ([Github](#))
 1. Develop a user-friendly tool with the capability to generate, search and remove notes.
 2. Utilize the technology stack comprising HTML, CSS, JavaScript, and ReactJS.

ACHIEVEMENTS

- **Hacktober Fest** : Contributed in Hacktober Fest 2022
- **Poster Exhibition** : Bagged 3rd Position in the Project Poster Exhibition organized by IPEC.
- **Spardha** : Bagged Gold Medal in Kho-Kho in Spardha organized by IPEC
- **Skkribler** : Bagged 2nd Position in the gaming event organized by Data Science Club IPEC
